Amendments to the Claims:

This listing of claims replaces and supersedes all prior versions, and listings, of claims in the application:

Listing of Claims:

1-7. (Cancelled).

8. (Currently Amended) A proton conductor gas sensor comprising:

having a sensor body having a membrane electrode assembly (MEA) comprising an electrolyte membrane, a sensing electrode, and a counter electrode, and a water reservoir positioned at one side of the sensor body and supplying water vapor to the membrane electrode assembly; said sensor comprising:

a cap having an opening for introducing ambient atmosphere towards said membrane electrode assembly from an opposite side of the membrane electrode assembly to the water reservoir; and

a thin <u>nonporous</u>, <u>metal</u> plate between said cap and said membrane electrode assembly, having a diffusion control hole connected to the opening of the cap and having a smaller diameter than that of the opening of the cap.

- 9.(Cancelled)
- 10. (New) The proton conductor gas sensor of claim 8, wherein said diffusion control hole is made mechanically by a punching process.
